BUS INNOVATIONS
IN PANDEMIC SITUATION
SAFETY AND VALUE
The spread of Covid-19 virus, has an impact on all fields, including the transportation sector and supporting industries.

Adi Putro, as one of the transportation industries, tries to make innovations to provide protection to passengers.
DESCRIPTION

Several **SAFETY** modifications have been made, such as:

1. Modified air conditioner with HEPA filter that helps the air circulation runs safely.
2. Air exchange system in the cabin with fresh outside air.
3. Installing automatic hand sanitizer, non contact thermometer, and UV light.
DESCRIPTION

From **VALUE** perspective, these modifications are cost-efficient for the bus operator especially in this pandemic situation.
